i) For

Feature	Operational DB (OLTP)	Data warehouse (DWH)	Data Lake
Primary Purpose	Powering day-to-day applications, user accounts and real-time transaction	Business intelligence, historical reporting & enterprises analytics	Raw data storage, big data processing & machine Learning model training
Data structure	Highly structured, normalized relational tables (3NF)	structured & cleaned dimensional models	Unstructured semi-structured and raw files.

a) ~~How~~ ^{using different} many people ~~used~~ pedestrian crossing in ~~different~~ ^{rush} time. So analyzing average pedestrians crossing usage time patterns ~~times~~ ^{counts} for reduce and manage. For examples like, average pedestrians ^{duration} which is crossing in each crossing in rush hours, average time, that already placed for each crossing.

• Recognize ~~mostly~~ busy places, ~~roads~~, like near schools, bus stops, companies, hospitals, roads like main roads, junctions, roads near to pedestrian crossings, bus holds and find solutions ~~to~~. These places mostly become ~~more~~ ^{more} busy places in rush-hour during morning, mid-day and evening. So in this ~~no~~ bottleneck places and identify ~~the~~ briefly reasons for those traffics, ^{at that} ~~happens~~ times. to get answers to ~~reduce~~ ^{to} assist and gain ~~analyze~~ ^{analyze} the important data.

g) Getting idea and knowledge about tourists coming by depending on ^{seasons} weather, ~~season~~ like summer, winter, ~~season~~ weather like, rainy, normal dates, ^{each an} and festivals like, Vesak, happy new year, Kandy-perahera, ~~to~~ in every year. So, getting brief ^{knowledge} ~~idea~~ about few years back would able ~~to predict~~ assist visitor preferences

• Understands tourists' reasons ^{and how they} to come to ella. For hobbies like ride bicycles, wild life photography. And, ^{check} are these tourists comes for day weeks, months, Also check are these tourists come solo, couple, family or with a team. And finding most popular ^{Atlas} destinations among them would be more valuable details ~~to~~ for analysis.
